This application contains claims directed to the following patentably distinct species of the claimed invention: Applicants should elect a single species of multi branched polymer by electing either polymers having a blocks structure or a graft structure or a star shaped structure; applicants should also elect either polymer chains "A1" or chains "A2" or chains "A3"; applicants should also elect a single species of X from those in claim 4 by electing residues derived from compounds having halogen atoms or hydroxyl groups or carboxyl groups or acid halide groups or amino groups or epoxy groups or isocyanato groups; if applicants elect polar polymer chains they should elect materials produced by homopolymerizing macromonomers or those obtained by copolymerizing macromonomers and also elect one of M1 OR M2 OR M3; if applicants elect "A2" they should elect either "C1" or "C2" structure as set out in claim 7; if applicants elect "A3" either monomer "D" or monomer "E"; if applicants elect "E" they should elect a single monomer from one of those in paragraph 127 of the published application while if they elect "E" they should elect a single monomer from one of those in paragraph 128.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Alternatively applicants can elect a single multibranched polymer by electing one of the examples readable on a species resulting from the above choices.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey C. Mullis whose telephone number is 571 272 1075. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Seidleck James can be reached on 703 308 2462. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Due to the complexity of this requirement, no telephone election was attempted.
